FAIRLAWN, Ohio - Two young Brunswick brothers, Luke and Paul Schlueter, put their love for baking to good use by making cookies and delivering them to Hospice families.

"I'm helping out other people and making God happy," said Paul Schlueter, a second grader.

The boys, ages 7 and 8, also developed a Hospice app based on knowledge they gained from a computer coding class at St. Ambrose School.

The app tracks volunteer hours and Hospice is considering expanding the use of the app to help other volunteers keep tabs on their service.

"It submits your first name, your last name, your date, your hours and your activity," said Luke Schlueter, who is in first grade.

On Tuesday, Hospice workers presented certificates to Luke and Paul to honor their volunteerism.

Twice a month, the siblings bring their baked cookies to the Cleveland Clinic Akron General Justin T. Rogers Hospice Care Center in Fairlawn.

Hospice Volunteer App

PROJECT DESCRIPTION	A 1st and 2nd grader created an app to collect Hospice volunteer hours so that they could obtain additional funding.
INPUTS	Computer science class
OUTCOMES	Students developed an Android app to track Hospice volunteer hours.
LEARNING IMPACTS	Students were interviewed on TV for their service and app development. Students were able to impact others by sharing their story and promoting computer science for K-8. They were also able to understand how they could create an app that could be used within the community. Students have an

	interest in pursuing STEM fields.
